## VERIFICATION OF CERTIFICATES AND MARKS CARDS

As technology evolves to provide us with enhanced security, convenience and a host of other benefits, we need to whole heartedly embrace it. In line with our vision of adopting the latest in technology for the benefit of our students and the university, we have adopted ePaper technology for our Degree Certificates & Transcripts.

Adopting this new technology has given us three unique benefits:

1. It has prevented the fraudulent issuance and alteration of details on the certificates, thereby protecting our reputation.

2. It allows for instant and secure verification by anyone across the world, allowing verifiers to cut their verification time to almost nil.

3. Our students have the pride of having on their walls the most advanced certificates. After all, that is the only physical thing they carry away from our university!

We are proud to announce that certificates and marks cards issued from the annual year 2018 onwards can be securely verified by anyone, anytime, anywhere in the world!

The ePaper technology ensures that the holder of the certificate, the details of the certificate and the originality of document can be robustly verified by simply following a process in Quick reference guide, at the convenience of your mobile phone.

Quick Reference Guide : https://epaper.e42.in/signup/help/qsg.htm

You may also verify the authenticity partially (only identity and credentials) by means of the Global Document ID Number printed on the document, by logging on to https://docunex.io

Certificates issued prior to the above-mentioned date may continue to be verified by checking with the registrar's office, the details which is available on the "Contact Us" page.
